

Data Logger Instructions

Your new logger comes ready to go.

Step One:

Press and hold the  button until the green LED lights up to start logging.

Step Two:

Place logger in location you want to monitor.

Once logging, pressing the  button will light up an LED to give a quick indication of the status. It will also add a marker to the data to show that you have checked it.

No alarms will be triggered in the first 30 minutes to allow the logger to settle at the monitored conditions.

	Red + Green single flash Logger is ready to start new logging session	Push Start / Stop button
	Green single flash The data logger is currently logging No alarm has been triggered	No action required
	Red single flash The data logger is currently logging An alarm has been triggered!	Check status in the PDF
	Green double flash The data logger's memory is full or the logger has been stopped. No alarm was triggered during the session.	Plug your logger in to a PC and download the PDF
	Red double flash The data logger's memory is full or the logger has been stopped. An alarm was triggered during the session!	Plug your logger in to a PC, download the PDF and check alarm condition

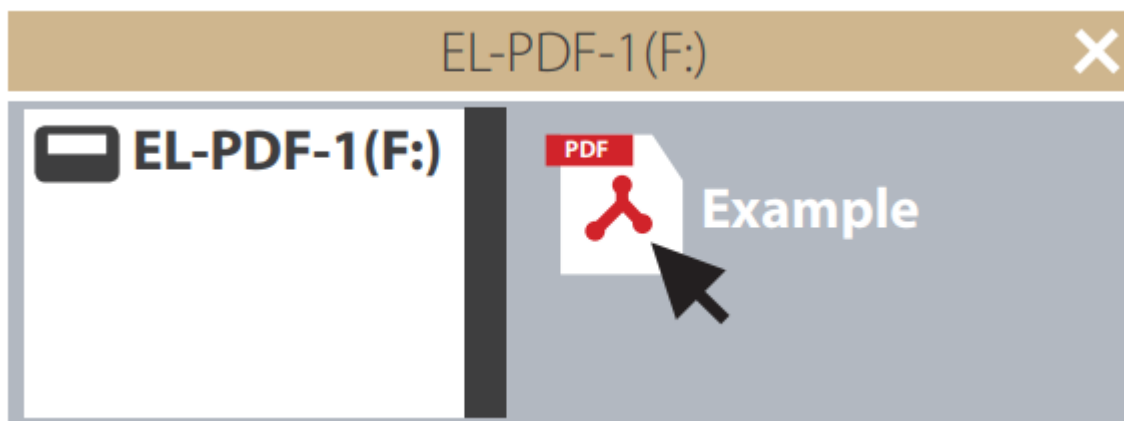

If no LEDs flash then the data logger has a flat battery and will need to be replaced. Please contact PM Strategic Sourcing Ltd on 01625 432094 or email Julie Goddard at julie@pm-labels.co.uk to order replacements.

Step Three:

When you are ready to view the recorded data on your logger, press and hold the  button to stop the current logging session. Remove the logger from the plastic sleeve and connect it to a USB port.

Step Four:

Copy the file off the device as if it were a memory stick.

Step Five:

Press the  button to start a new data logging session. To maintain IP67 status, the logger must be placed in the plastic accessory bag originally supplied with the logger. Replacement bags can also be ordered from PM Strategic Sourcing Ltd by calling 01625 432094 or emailing Julie Goddard at julie@pm-labels.co.uk
